DETAILED ACTION

Response to Amendment

Applicant's election with traverse of group I, claims 1-4, and 12, in the reply filed on October 24, 2005 is acknowledged, examiner agrees with the applicant traverse.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1-11, drawn to an electro-optical device, classified in class 257, subclass 93.
- II. Claim 12-13, drawn to a method of an electro-optical device, classified in class 438, subclass 22.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the device can have a different method, for example forming the conductive member and the sealant on the first electrode of the first substrate, then form the second electrode on top of the conductive member and form second substrate on top of the second electrode.

A telephone call was made to Mr. G. Gregory Schivley on November 28, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
